Subject: C6 Resources, LLC -- Draft EPA UIC Permit

Damonica,

Please see the attached C6 Resources, LLC draft Class V-Experimental UIC permit. As discussed during previous correspondence, we expect that Shell's internal review of the permit conditions will take somewhere in the range of 2-4 weeks. We have included Solano County,

CDOGGR, and Ca RWQCB on this email as well. If representatives from these organizations would like to comment on permit conditions, please feel free to do so. To expedite the review process, please prepare a document outlining and explaining any suggestions, corrections or proposed edits that Shell (or other included organizations) would like to bring to our attention before the permit is reviewed and released for Public Notice.

Please note that EPA expects C6 Resources, LLC to submit an updated 'Operations Timeline,' in Appendix I of the draft permit when they submit their comments to EPA. This timeline will display approximate anticipated dates of drilling, construction, injection, (temporary) plugging and abandonment, subsequent monitoring, securing of financial assurance, and any other significant milestones associated with the construction of and injection into well C6-1 (and monitoring by use of well C6-2).

If you have any questions about the permit conditions as written, please let me know.
